CANopen Gateway

CAN Gateway

Advantages of the Gateway concept

1. The Gateway allows the use of a small and robust encoder.
2. Cost effective exchange of encoder (no need to change the Gateway).
3. Reduction of Bus-cabling (only one cable between Gateway and encoder is needed).
4. Flexible choice of encoders as the same Gateway can be used with different encoders.
5. Advanced diagnostics integrated in the basic encoders, together with the sensing parts.
6. Allows operation of encoder in high temperature and hard environmental conditions.
